

Credit card payment

This Directive shall come into force on April 1, 2015. It renders any previous directive on the same topic null and void.

In order to comply with new safety standards set by credit card companies and to ensure the security and confidentiality of your bank transactions, the *Direction des titres miniers et des systèmes* must revise its payment options.

Any transmission of credit card data by the following means – mail, e-mail, fax and telephone – is now prohibited.

Customers who would like to make credit card payments must do so via Internet through the [GESTIM website](#). You must be a privilege member to have this option.

Any banking information received in a prohibited manner after April 1, 2015, will be destroyed.

N.B.: Cheques are accepted.

You will find an updated version of [our forms](#) on the website of the Ministère de l'Énergie et des Ressources naturelles.

For further information, please contact customer service at 1-800-363-7233.
