| | | | |

B.3 GEOLOGICAL DATA OBSERVED IN EACH TRENCH AND EACH STRIPPED OUTCROP

Rock type, structure, alterations and mineralizations

B.4 ANALYTICAL RESULTS

If analyses have been performed by a laboratory, write the significant results.

B.4.1 Collected chosen samples

B.4.2 Channel samples

B.5 DOCUMENTS TO ATTACH

- A map and, where applicable, plans drawn at a scale showing the location of stripped areas and trenches and identifying the geological features and analyzed samples. The map and plans should be identified, at the four corners using geographic coordinates (latitude, longitude) or UTM coordinates (Universel Transverse de Mercator), as well as the mode (NAD83) in accordance with the National Topographic System of Canada (NTS).
- The analyses certificates listing the complete results obtained for each sample with sample numbers corresponding to the numbers indicated on the map and sketches. The analyses certificates must be dated and signed by the laboratory supervisor where the analyses have been performed.
- A map of mining rights at a scale of 1:50 000 showing the mining property and the perimeter of the work program.

Simplified report— Annexe C

Sampling

Report on sampling work of \$5000 or less (section 82 of regulation)

- Use Annexe C to report the following : bulk sampling , surface sampling and sampling in short drill-holes (5 meters or less into bedrock).
- Channel sampling work must be reported in Annexe B.
 Prospecting of dimension stone and block sampling work to open a mine face must be reported in Annexe D.

| C.1 | 1 DATE OF WORK CARRYING OUT | | | | | | |
|------|-----------------------------|-------|-----|-----|----------------|-------|-----|
| Star | t of work prog | gram | | _ I | End of work pr | ogram | |
| | Year | Month | Day | | Year | Month | Day |
| 0.0 | | | | | | | |

C.2 SAMPLED MATERIALS

| Type of materials | 4 | Number of samples | Quantities |
|-------------------|---|----------------------|------------|
| Rock | | | |
| Soil | | | |
| Streams sediment | | | |
| Heavy minerals | | | |
| Other (specify) | | | |
| | | | |

C.3 SIGNIFICANT ANALYTICAL RESULTS

C.4 DOCUMENTS TO ATTACH

- A map drawn at appropriate scale showing the locatation of the collected samples The the four corners should be identified, using geographic coordinates (latitude, longitude) or UTM coordinates (Universel Transverse de Mercator), as well as the mode (NAD83) in accordance with the National Topographic System of Canada (NTS).
- The analysis certificates listing the complete results obtained for each sample with sample numbers corresponding to the numbers indicated on the map. The analysis certificates must be dated and signed by the laboratory supervisor where the analyses have been performed.
- A map of mining rights at a scale of 1:50,000 showing the mining property and the perimeter of the work program.

Work to open face Search for dimension stone

Report on open face work of $\$10\ 000\ or\ less$ (section 82 of regulation)

| D.1 | DATE O | F WORK C | ARRYIN | G OUT | | | |
