<b>Total (US\$)</b>					<b>\$1,547,782,217</b>	<b>\$82,799,913</b>

## Notes with regard to data made public under Sections 120 and 215 of the Mining Act

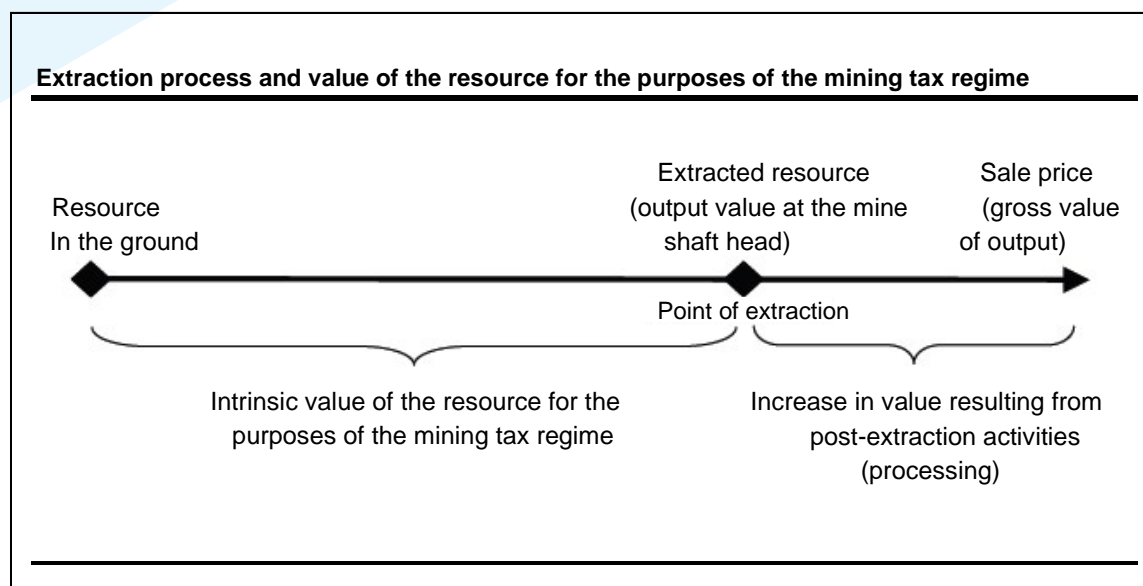

**Note 1:** Main mineral substance(s) sold.

**Note 2:** The units of measurement are those provided by the operators.

(oz : ounce; tc : short ton (US ton); kg : kilogram; T : metric ton; ct : carat)

**Note 3:** The objective of the mining tax regime is to tax the resource at the time of its extraction at the mine shaft head, which means that the value added by the processing activities is exempt from mining tax.

This increase in value is not related to the economic value of the resource and does not belong to Quebecers. However, it is subject to the general corporate income tax system, like all other manufacturing activities.

**Note 4:** Data relative to operators with mining income earned in their fiscal year ending in 2019.

**Note 5:** An operator is required to pay mining duties corresponding to the greater amount between its minimum mining tax and its mining tax on annual profit, for the fiscal year.

**Note 6:** These operators have transmitted their information using functional currency, which is a currency other than the Canadian dollar. Therefore, the data was presented in the chosen currency. The conversion into Canadian dollar cannot be performed because of the different variations in the exchange rate during the year.

Sources: Certain extracts of the explanatory notes have been derived from the documents *Information Bulletin 2013-4* and *A new mining tax regime fair for all*, published by the ministère des Finances du Québec.
